

About Battelle

Battelle is the world's largest nonprofit independent research and development organization, providing innovative solutions to the world's most pressing needs through its four global businesses: Health and Life Sciences, National Security, Energy Technology, and Laboratory Management. It advances scientific discovery and application by conducting \$5 billion in global R&D annually through contract research, laboratory management, and technology commercialization.

Regulatory Affairs Group

Regulatory Affairs Group Product Registration and Defense Risk Assessment and Evaluation

Battelle AgriFood has expanded its fields of expertise and services and created a group to respond to the ever-growing demand of its worldwide clients.

A Complete Service

Battelle AgriFood offers a complete range of regulatory services in the fields of Agrochemicals and Biocides:

Full-scale registration and re-registration support including:

- Understanding and analysis of regulatory requirements
- Database evaluation, data gap identification, and proposal of testing strategies
- Study monitoring and project management
- Dossier preparation and follow-up (European registrations and national approvals)

Expert advice in dossier defense:

- Pre-submission meetings with key regulatory experts
- Negotiation of registration strategies with national and EU regulators
- Follow-up through entire evaluation process

Risk assessment and evaluation:

- In the area of human health (applicators and consumers)
- Impact on the environment and ecotoxicology

- Discussion of risk evaluation strategies with customers and regulators

Commitment to Successful Registration

- In order to satisfy the customers' needs, Battelle AgriFood relies on an international, well-trained, and experienced staff from both research and industry
- This international dimension allows Battelle AgriFood to offer an integrated process from scientific lab work to strong regulatory assistance
- Battelle AgriFood has pioneered the new concept of risk/value sharing in the field of product registration and development. Risk/value sharing with Battelle AgriFood allows companies to maintain products on the market while focussing their limited human and financial resources on core business
- Evaluating risks from a full spectrum of contaminants and media
- Conducting reliable and defensible risk assessments

Our risk assessment results provide the basis for risk management decisions to minimize remedial footprints while achieving human health and environmental protection objectives as well as project goals.
