

About Battelle

Battelle, established in 1929, is the largest nonprofit, independent R&d organization in the world. Battelle's technological reach includes overseeing over 20,000 staff and more than \$4 billion in R&d at 130 locations, including private laboratories, the seven national laboratories Battelle manages and co-manages, and numerous regional offices.

Radiographic Imaging Center

Battelle's Radiographic Imaging Center provides X-ray imagery and analysis that allows 3-D reconstructions and infinite cross sections from any discrimination. Our micro-focus, computed tomography X-ray system gives you 3-D pictures from every angle of the smallest interior details for easy problem solving. Our unique service offering includes the following:

- Design and Prototyping
- Quality Control Inspections
- Nondestructive Evaluations
- Forensic Failure Analysis
- Research and Development

Battelle houses a diverse pool of engineering talent and specialized equipment to quickly find and solve engineering problems. Battelle has extensive complementary capabilities and is experienced in many technical areas, including the following:

- Adhesives and Sealants
- Analytic Testing and Trace Analysis
- Applied Molecular Modeling
- Coatings
- Failure Analysis and Forensics
- Fatigue and Life Prediction
- Finite Element Analysis
- High-Performance Composites
- Materials Characterization
- Molds and Casting Design and Fabrication
- Molecular Modeling
- Nanostructures and Microstructures
- Organic and Polymer Synthesis
- Packaging
- Photonics
- Plastics and Elastomers
- Printing and Reprographics Technologies
- Process Analysis/Modeling
- Rapid Prototyping
- Reliability Analysis
- Resolving Tolerance Stack-Ups
- Reverse Engineering
- Stress/Corrosion
- Tribology
- Vibration Analysis and Testing
