

What Our Customers

Say About Us...

"We really enjoy working with Battelle to jointly develop business opportunities—they're technically very strong, know the energy market, are highly responsive, and have a good business focus."

Scott Ungerer
Managing Director
EnerTech Capital Partners

"Each year, we count on Battelle to submit outstanding entries to our R&D 100 Award competition for the most technologically significant products introduced into the marketplace—and we see 'the best' from many of the most prestigious companies, research organizations, and universities in the world. Each year, the editors of *R&D Magazine* and a select group of technology specialists place Battelle innovation among the winners of multiple awards. In 2000, Battelle and the national labs it manages and co-manages for the Department of Energy collected 12 of the prestigious 100 awards, bringing their total to 85. Congratulations, Battelle. Looking forward to seeing you in 2001!"

Tim Studd
Editor-in-Chief
R&D Magazine

"We know that advanced technologies will play an increasingly important role in the success of our products and services in the 21st century. Our corporate network of world-class research organizations helps position us to capitalize on technology opportunities. Battelle has always been an important technology partner for us, and the value of that relationship is growing every day, as seen in the public sale of PIRI, a company that resulted from our collaboration with Battelle and NTT. I am confident that Mitsubishi and Battelle can together create many more outstanding successes in the future."

Mikio Sasaki
President & CEO
Mitsubishi Corporation

"Battelle and Abbott have had a long, successful history in the development of proprietary devices for the delivery of nutritional products, and we look forward to expanding this relationship into the area of pharmaceutical products for respiratory diseases."

Joy Amundson
President, Ross Products Division
Senior Vice President, Abbott Laboratories
