

CVS CAREMARK MAINTENANCE DRUG LIST

AS OF 10/01/2009

Provided below is a reference of the CVS Caremark proprietary list of standard maintenance drugs. Our Maintenance Drug List (MDL) includes medicines commonly used to treat chronic disease states with no therapeutic endpoint. In other words, therapy with these drugs is not considered curative. Maintenance drug categories include but are not limited to Proton Pump Inhibitors, Non-Sedating Antihistamines, Contraceptives, Antidepressants and Diabetic Supplies.

The MDL includes Maintenance Drugs as indicated by Medi-Span[®] and accommodate CVS Caremark Business rules and federal laws. This list is used as a reference for all applicable CVS Caremark Clinical programs. To make sure the list is up to date, it is reviewed and updated daily (by an external source) as well as quarterly (by CVS Caremark Clinical staff). Below is an example of drugs which may appear on the list. Where a generic is available, it is listed by the generic name. If no generic is available, then the brand name appears.

Due to the vast number of available medicines, this list is not inclusive, does not guarantee coverage and is subject to change. This drug list represents a summary of prescription coverage. Specific prescription benefit plan design may not cover certain categories, regardless of their appearance on this list. If you have questions, please visit us on the Web at www.caremark.com or call the number on the back of your card.
