

# Army Research Office - Scientific Services Program (ARO/SSP)

**Scope:** Work of a scientific and technical nature for the solution of problems related to research and development that can be described as a study, analysis, evaluation, assessment or interpretation may be conducted through the SSP. SSP tasks can be performed in any science and technology area of interest to all federal government agencies. For example, SSP tasks are currently being performed in these technology areas: Chemical Sciences, Life Sciences, Material Sciences, Physics, Medical and Health Sciences, Electronics and Computer Sciences, Environmental Sciences, Engineering Sciences, Mathematics, Modeling and Stimulation, Psychology, and Social Science.

Any SOW recommending the work be performed by Battelle is sole source to Battelle as we hold the prime contract and therefore the work is considered pre-competed. Subcontractor pass-through is allowed; there is no minimum percentage of the work that must be performed by Battelle. Work can be subcontracted to small and large business, non-profit organizations, universities, academicians, individuals not affiliated with a business or university, and any combination of the above.

**User Restrictions:** Use of this vehicle is open to Federal government agencies only.

**IDIQ Contract Number:**  
W911NF-07-D-0001  
Competitively Awarded

**Expires:**  
11/30/2011

**Task Orders:**  
Sole Source to Battelle  
Deliverable-Based  
CPFF, FFP, T&M  
PoP: 24 month  
\$750K limit
