

Design and Engineering Support Program (DESP II)

Scope: The DESP II is a five-year multiple award Indefinite Delivery/Indefinite Quantity (ID/IQ) contract vehicle available for usage within AFMC, the Air Force, DoD, and other government agencies for design and engineering support tasks; such as technology insertion, reliability and maintainability, deployability improvements, environmental and safety compliance, improvement of depot manufacturing and/or repair processes and development of information management systems and process models. The contract ceiling is set at \$1.9B. The order writing period is for 5-years and the performance period on any task order must be complete within two years after the expiration date of the basic contract. All Contract Engineering Tasks (CETs) shall be written in performance terms, in accordance with AFI 63-124. All work shall be described in terms of "what" the required output is, rather than "how" the work is to be performed or the number of hours to be provided, except when deemed essential by functional activity for safety and/or security reasons.

User Restrictions: May be used by all Air Force commands, DoD agencies (e.g., Army, Navy, Marines), and other Government entities (e.g., NASA, DOE, DOT, DOS, EPA, OSHA, Coast Guard, Homeland Security, FAA, FEMA, etc.) having similar systems and/or needs.

IDIQ Contract Number:
FA8222-05-D-0003

Expires:
6/30/2012

Task Orders:
Multiple Award Contract
Service-Based
CPFF, FFP, T&M
PoP: identified with each task
