Eleventh International Conference on the Remediation of Chlorinated and Recalcitrant Compounds
April 8-12, 2018 | Palm Springs, California

Sponsor & Exhibitor Prospectus
ABOUT THE CONFERENCE

The Eleventh International Conference on Remediation of Chlorinated and Recalcitrant Compounds will be held April 8-12, 2018, in Palm Springs, California.

Battelle’s Chlorinated Conference is the premier meeting, with the most comprehensive overview, on the application of innovative technologies and approaches for characterization, monitoring and management of chlorinated and complex sites.

The 2018 Conference will be another outstanding opportunity for the environmental remediation community to meet, learn, and network with the best-of-the-best in science, engineering, consulting, and regulation from universities, state-and-federal government agencies, R&D, and manufacturing firms from around the world.

2016 Conference Highlights

The 2016 Chlorinated Conference was one of extraordinary growth and was attended by more than 1,660 environmental professionals from 28 countries. Our largest technical program in Chlorinated Conference history was conducted with nearly 900 platform talks and posters presented in 71 breakout sessions and 10 panel discussions. We were also pleased to host more than 100 Exhibitors, another record, over the length of the program.

CONFERENCE VENUE & HOTELS

The Conference technical program will be conducted at the Palm Springs Convention Center (PSCC) and room blocks will be available at the adjoining Renaissance Palm Springs Hotel and nearby Hilton Palm Springs Hotel. Information on room rates and reservation options will be available in May 2017.

The PSCC, managed by SMG Worldwide, participates in a comprehensive environmental program designed to utilize best practices in water conservation, energy efficiency, waste diversion, and air quality. SMG’s Green IMPACT Program (which stands for innovation, mindfulness, participation, accountability, consistency and transparency) supports green and sustainable practices at its conference facilities worldwide. The in-house catering partner, Savoury’s, utilizes biodegradable products, locally grown food, and donates excess food to local assistance programs. It also participates in the City of Palm Springs’ pilot composting program.
CONFERENCE SPONSOR DETAILS

The 2018 Chlorinated Conference is now accepting Conference Sponsors. The financial contributions of the Sponsors help defray general operating costs of planning and conducting the Conference. Sponsors are public- and private-sector organizations active in environmental assessment, remediation, and management services and products.

Sponsorship provides the sponsoring organization a highlighted role before, during, and after the Conference. Sponsorship offers many advertising and networking opportunities to create collaborative relationships with other key organizations and professionals in the environmental remediation field.

If your organization would like to be a Sponsor please fill out and return the Conference Sponsorship Agreement found on the Chlorinated Conference website.
